imilar announcement for Anderson? Mr. Walters M. Dean and Miss Alice L. Finley, both of this County, were united wedlock on the 26th ult., at the residence of the bride's father, Rev. W. H. King per-

forming the ceremony. A party of twelve or fifteen men and boys raided a crow roost about two miles south of this place on Monday night, and though they found hundreds of these birds we !earn only one suffered death.

James E. Hagood, Esq., of Charleston, Clerk of the U. S. Circuit Court for the District of South Carolina, spent a day or two of this week with his mother-in-law. Mrs. E. Robinson, of this place,

Mr. L. Newton Clinkscales and Miss Maggie Hamilton, both of this County, were married at the home of the bride on the evening of the 27th ult., Rev. W. F. Pearson, of Due West, officiating.

There are hardly two time-keepers in the town that agree in the computation of time, and as a consequence there is often confusion and misunderstanding between individuals. A town clock would correct all

The relatives and friends of Mr. and Mrs. W. B. Crow, who left this County last November for Texas, will regret to hear of the death of their little son, Charlie, which occurred on the 20th of January last, in the fifth year of his age. The marriage rite of Mr. L. E. Norryce.

of Greenville, and Miss Ida Norris, of Anrson county, youngest daughter of Capt. P. K. Norris, was celebrated at the residen of the bride's father on Thursday last, Rev. D. E. Frierson, D. D., officiating.

Three young men from Abbeville county passed up the railroad on Tuesday evening with 25 or 30 colored people en route to rkansas, where they are preparing to run big cotton farm. This is the second or third lot of hands they have taken from that county recently.

The passenger fare on the Columbia and Greenville Railroad was reduced to four cents a mile on the 1st instant. We dare say the company will make by this in the long run, and that business considerations alone induced the reduction. Nevertheless, it will effect a great saving to passengers on the road, and will be duly appreciated by the public generally.

Some enterprising gentlemen of Hodges, in Abbeville county, are organizing a joint stock company for the purpose of erecting a cotton factory at that place. About \$20, 000 in money and a 150-horse power engine has been subscribed, and \$45,000 or \$50,000 more is expected. The gentlemen in charge of the enterprise hope to secure a sufficient amount to have factory in operation by Oc-

The amount of the first installment of taxes voted in Williamston and Belton townships to the Atlantic and French Broad Valley Railroad was \$3,001.17, of which amount \$1,763 33 has been collected, leaving the sum of \$1,237.84 due. It is re ported that there will be litigation over this balance, and that a very determined fight is to be made, especially over the Belton

Up to Monday night, 31st January, there had been received at the depot at this place, since the 23d of August last, 16,204 bales of cotton, or about as much as were received for the twelve months ending August 31, 1880. This is a gratifying exhibit, and shows beyond question that the business of Anderson is rapidly increasing. This result is traceable to two causes mainly—the high prices paid for cotton by our merchants and the low prices at which they sell goods

We are in receipt of the Seed Catalogue of David Landreth & Sons, Philadelphia, Pa. This arm, established in 1784, is the oldest in their line in the United States, and is widely known for square dealing. Their Almanac and Rural Register and Catalogue is an improvement on former editions. It is illustrated with cuts of their farm buildings and the more important vegetables. It market gardeners and amateurs. It is sent

contains valuable tables and instructions to by mail, postpaid, to all who apply for it. If those who wish to yell and shrick like wild Indians taking a scalp, or stamp like a kicking mule, will only indulge their wishes before they go to the entertainment next

Friday night it will contribute greatly to the pleasure of all others in attendance. and we assure them it will not damage the reputation of the town with any strangers who may happen to be present. It is a harmless amusement when practiced on a hunting tramp or a base ball frolic, but it is hardly the proper thing in the presence of ladies in a small hall.

The McSmith Music House, located at Greenville, S. C., and Charlotte, N. C., is an enterprising establishment, and is extending its business in the Carolinas. by pursuing a liberal and progressive policy. Mr. McSmith, who runs the Charlotte business, paid us a call while in town last week, and displayed still more of his good sense and enterprise by advertising his extensive and displayed still more of his good sense and enterprise by advertising his extensive business in the Intelligences. The house has done a big business in this County during the past three or four years, and we have yet to hear of the first complaint against any of the instruments sold by it.

McSmith does what is right by all of his customers. See advertisement elsewhere.

The Savannah Valley Railroad,

The collection of the first installment of taxes due the Savannah Valley Railroad, without the penalty, was completed on last Tuesday. The total levy for the townships was \$7,244.56, of which sum \$4.629.32 has been collected, leaving unpaid \$2,615.24. The total levy for the town was \$4,566.27, of which about \$2,150.00 has been collected, leaving unpaid about \$2,416.27. It will, therefore, be seen that nearly one-half of the taxes due have not been paid, and it is understood that there will be litigation apon it. Those who have refused to pay are confident of having the subscription set aside, while the railroad authorities are equally certain that they will be able to collect it. The issue will have to be decided by the Courts.

The Williamston Cotton Factory. The Charleston News and Courier of the 26th ult., says that the books of subscription to the capital stock of the Williamston Cotton Factory were opened in that city on the day previous, and by 2 o'clock p. m. the sum of \$300,000 had been subscribed, the number of subscribers being about ninety. The capital stock of the company will be \$400,000, and we understand the whole amount has been secured and that work on the factory will begin at an early day. The men at the head of the enterprise

Cotton Planted in Checks.

A correspondent of the Walhalla Courier, writing from Fair Play, in Oconee county, gives that journal an article on the above subject, in which the results of some experiments made by citizens of that community are detailed. It is something new in cotton culture, and the fine yield secured would seem to indicate that planting in checks is an improvement on the old way of drilling in the row. The correspondent says :

an improvement on the old way of drilling in the row. The correspondent says:

"The time for planting cotton will soon be here again, and as I have noticed several farmers trying the experiment of checking their cotton, I will give you a word or two on the subject, giving principally the views of the farmers who have made the experiment. We should keep abreast of the times and all new practical theories in regard to the profitable production of our chief staple should be thoroug ly looked into by our farmers. I give the statements below that other farmers may reap the benefits of this mode of planting e siton.

Last summer waile at Mr. George W. Phillips', on Colonel's Fork, I noticed that he had planted a little over one and a half acres in checks. On making some inquiries in regard to the cultivation of cotton in checks, &c., Mr. Phillips informed me that he had laid off the rows three feet each way, but before doing this he had broken the ground very deep- with small plows and bedded it. The guano was put in the checks and then covered lightly with a little earth. The whole amount of guano used was 325 pounds. After putting in the guano the seed were dropped, six or seven in each check, and covered with a small plow. At the proper time the cotton was put to a stand, two stalks being left in each hill or check. The land was plowed both ways, making the work done with the hoe very light. The yield from this acre and a half was 2,575 pounds of seed cotton. The land was by no means of the best quality, but rather ordinary. Mr. Phillips also informed me that ke could cultivate as much cotton again planted in the check as he could drilled. Owing to the condition now-adays of labor in this State our farmers will have to use all the means in their power to cultivate their crops as cheaply as possible, and to make what they do cultivate yield as much as possible. It is contended by some that cotton in checks can be worked with one-half the labor and expense that it requires to work drilled cotton; that it will irow l

first tends to reduce the cost of labor in the cultivation of the staple, and to necessarily increase the net profits, and the last three in increasing the yield per acre, and also increasing the profits.

Mr. W. J. Hix agrees very nearly with Mr. Phillips, in his statement in regard to checked cotton. He is convinced that it is by far the best way to plant cotton. He will plant a number of acres this way the present year. Mr. Hix planted a two-acre lot last year, and though he did not succeed in geiting a good stand, still he made an excellent crop on the two acres. The rows were laid off about the same width as those mentioned above, but instead of having two stalks in the hill, only one was left. About one hundred and fifty pounds of guano were used, and the yield was about 2,700 pounds of seed cotton."

The gentlemen mentioned in the above article are well known in this County as enterprising and successful farmers, and their opinions on any subject connected with agriculture will have weight with the farming community.
